Rear Admiral T. C. Watson is a through passengers by the Peking to-day for Manila, whither he goes to suc-

Thursday afternoon, is dead. He breathed his last in the Queen's hospital this morning.

When the man was hurt he was taken to his home. This paper stated that his injuries were of a serious nature. The next day a workman at the foundry brought the report from the man that he would probably be out in a week. Yenterday afternoon the foreman of the appointment shop called upon Kaili and found him in a high fever. It was plain to be seen that he was in a dangerous way. A doctor was at once called. The physician ordered him immediately to the hospital, and he was sent there. Last night it was clear that the end was near and this morning he died, as has been stated.

The accident of Thursday evening will be remembered. Kaili and others were moving a twenty-ton boiler. They had it partly on rollers when one end of it became unbalanced and eased off upon the unfortunate man. The boiler struck him on the side and passed almost all the way down.

Friends with the man at the time, thought the Injuries were serious and so stated. Kaili, however, did not feel so and went home in place of to a goton.

pia, the flagship of the fleet, and will journey to New York by way of the Suez canal.

Admiral Watson has spent today looking over the city. As Captain Watson he was in Honolulu in 1892, when he relieved Captain Sampson from the San Francisco.

During the Spanish war Watson was a commodore. He had charge of one of the squadrons looking for Cervera's fleet, but never came into the battle of Santiago. When the fleet was formed to send to Spain, just before the end of hostilities, it was the intention of the Administration to have Watson com-mand it. Of the career of the admiral the following will be of interest:

and fight all through the Civil war. He served on the flagship until peace was declared. It was Watson, then a young lieutenant, who lashed Farragut to the rigging during the battle of Mobile bay He is a grandson of John J. Crittenden who was once attorney-general of the United States and who wrote the fa-mous Crittenden compromise bill. He is mous Crittenden compromise bill. He is a nephew of General George B. Crittenden and Thomas L. Crittenden, who were among the heroes of the Civil war. The rear admiral is a high type of American citizen—cool. fearless, quick in judgment. He is tall and slender, with hair prematurely white, and the hands and face of a woman, but he is a prudent and resourceful commander, with the persistence of a bulldog and the courage of a lion. Moreover, he is an earnest Christian, but of the Stonewall Jackson sort. Hard fighting follows his praying. To his sailors he is known as praying. To his sailors he is known as "Able Seaman Johnny," which is considered as great a compliment as could be given him. Watson was married in They were arraigned before Judge Perry and plead as follows

### ARTIFICIAL WATERS AS FACTORS

OF DISEASE. At the instance of the Lucknow Cantonment medical authorities, two aerated water factories have been closed, the water having been pronounced unfit for use. It is to be hoped that the decision will induce the medical authorities in India to overhaul the aerated water factories under their jurisdiction at other stations, particularly where enteric fever is prevalent. The popularity of Apollinaris Natural Mineral Water seems to have no limits. It is obtainable in practically all parts of the world, and in New York, as in Eng-land, no social function is without "The Queen of Table Waters." The menus of the assembly ball given at the Waldorf-Astoria, the Metropolitan Club dance given at Sherry's, as well as those of the Vanderbilt and and the Astor balls, bear witness to the pre-eminence of Apollinaris. In-dian authorities might do worse than follow the example here set them.— Land and Water, 18th February, 1899.

### MORE OF THEM USED.

MORE OF THEM USED.

There are probably more Singer sewing machines used in the United States than of any other one make. This is a very excellent guarantee that they are one of the very best machines. The points of merit are strength, durability, easy running and simple construction. Very little mechanism to get out of order makes repair bills small. When in need of a new sewing machine examine the Singer before purchasing any other make. B. Bergerson, agent, Bethel street.

### CRUSHING OF BOILER TOO MUCH SUCCESSOR TO ADMIRAL DEWEY WILL HAVE CHARGE OF NAVAL A SMALL STORM AT THE ANNUAL HOW ISLANDS WILL BE RULED BUSINESS HERE.

Is Commandant C. F. Merry of Boston Supply Station-ls Permanently Assigned to Honolulu.

Commander C. F. Merry, U. S. N. arrived by the Peking last night to take charge of the naval station at Honolulu. He received the appointment about three weeks ago and started immediately for San Francisco. This morning he presented his credentials to Consul Haywood and the latter turned over the duties of the United States naval reservation to

"I like Honolulu," said the communder this morning at the Consulate. "In fact I always did have a foible for the Islands. This is by no means my first visit here. I passed through Honolulu two years ago to take charge of a vessel in the Orient. Nine months later I was ordered home for

land service. "Honolulu is now to be my permanent home. My official title is 'Com-mandant, Naval Station at Honolulu.' That is the address of the navy department to me. For the present I will have a room at the Hawaiian hotel, but will later locate in the city. I will have an office on the govern-ment reservation beyond the fish market. A building will be put up for

the purpose. During the war with Spain Commander Merry was at the head of the supply department at Boston. He therefore saw no active service, although he had his hands full in keeping up with the needs of the North

Atlantic squadron. The commander is a man of fifty of rather large physique and an air of business all over. He impresses

ns being peculiarly fitted for the work he will have to do here. The new man will only have charge of the reservation, and having the handling of ships in quest of coal. the following will be of interest:

Rear Admiral Watson comes down from a line of American fighters. He was born in Frankfort, Ky., and was graduated from the Naval Academy in time to get aboard Farragut's flagship and fight all through the Civil war. He and fight all through the Civil war. ## MEETING.

Official Report of President Baldwin Instructions Forwarded to Commission. Received-Board of Directors Reelected-Malcontents Defeated.

SAN FRANCISCO, May 12.-Charles S. Wheeler recorded an indignant pro-test Wednesday at the annual meeting of the stock holders of the Hawaiian Sugar and Commercial Company when W. H. Chickering offered a resolution to ratify the action of the board of directors in upsetting Rudolph Spreckels deal with the Maui Railway and Steamship Company, but he failed to carry his point. The stock holders, by a vote of 91,555 to 150 shares, accorded the approval requested.

Apart from this incident everything assed off smoothly. Vice-president Ai-sert Meyer presided in the absence of the president. H. P. Baldwin, whose report, as read by the secretary, gave general satisfaction. At the time it was written the mill had been running only six weeks, but it was thought that the plantation's output for 1839 would be

about 16,000 tons of sugar. For the crop of 1900 there are 2552 acres of cane planted, with 80 of rattoons, and ,while planted, with 80 of Pattoons, and white it is early to make an estimate, the yield bids fair to be more than 16,000 tons. The Hawaiian company's sugar crop for 1901, however, is placed at 30,-000 tons, as in addition to cane several bundred acres of rattoons will be cultihundred acres of rattoons will be cultivated. It was reported that contracts had been made for machinery and pipes during the year amounting to \$434,609, of which sum \$147,043 75 had been paid in 1898, and the balance of \$287,565 25 would be paid during the calendar year. It was also stated that heretofore the only land irrigated from the ditches at the 200-foot elevation had been cultivated, but that between the 200- and

the 200-foot elevation had been cultivated, but that between the 200- and 500-foot elevation there were 6400 acres which would be brought under cultivation by the pamping plants.

The financial portions of the reports of the president and the secretary showed that the crop of the Hawaiian Commercial Company plantation during 1898 had amounted to 14,385 tons, which had netted 68 70 a ton. The assets of the company were given as \$4,333.872 32, and its liabilities at \$1,064,132 21, leaving the net assets \$3,329,740 11. The capital paid in was \$2,312,755, making the surplus \$1,016,985 11. The board of directors was reelected as folboard of directors was reelected as fol-lows: H. P. Baldwin, W. M. Alexander, W. H. ### A GOOD SHOW.

A Stranger in New York" is Well Presented.

Another crowded house greeted the Hoyt and McKee company last night. The attraction was "A Stranger in New York," It was played with a good deal of dash and abandon, and caught the audience. It was the best performance yet given.

As usual Harry Conor as a stranger in New York carried the leading role and did it well. His song "Don't You Know" was one of the best things on the program, and there were a good many good things in the musical line.

The cake walk of the McCoy sixters was particularly fetching and they were recalled again and again.

It was a good show thoroughly enjoyable and will be repeated this evening.

### AT THE ORPHEUM.

There was a fair sized audience at the Orpheum last night and all were delighted with the play. Post kept the audience in a roar, and the singing and dancing was excellent. Autonomous Form to be Granted. More Liberal Than at Porto Rico,

WASHINGTON, May 10.—The Secretary of State has telegraphed to Prendent Schurman of the Philippines Com-

tary of State has telegraphed to President Schurman of the Philippines Commission, by direction of President Mc-Kinley, a statement of the character of the government that the United States will be willing to establish in the Philippines after the surrender of Agunaido's forces and the restoration somewhat similar, although a little more liberal, even, than that now in operation in Porto Rico. The head of the government will be a governor, whose functions will be civil, although he may be a military man.

There will be an advisory council composed of natives of the Philippines, whose business it will be to confer with the governor on official matters and suggest changes in the manner of exercising authority. The local governments will be entirely in the hands of natives, subject to certain supervision by American authorities. The plan proposed amounts practically to an autonomous system, and it is believed here that it will be acceptable to the natives. It will continue only until Congress decides what shall be the character of the permanent government of the islands. Confidence is expressed that the absence of news means that negotiations
